PROFILE

Senior software developer with a strong focus on front-end development in Flutter while also bringing broad experience across various tech stacks. I consistently deliver high-quality, thoughtfully structured solutions built for long-term success. I've successfully led multiple application redesigns, architectural transformations, and helped grow teams across various companies.

EMPLOYMENT HISTORY

Aug 2023 — Apr 2025

Flutter developer, Rumble

Led the redesign of the legacy mobile application

- Refactored existing code to improve clarity and maintainability, resulting in significantly better performance and a more robust architecture.
- Implemented modern UI/UX best practices using the latest Flutter SDK features.
- Ensured full responsiveness across various screen sizes and device types, delivering a consistent user experience on phones, tablets.
- Integrated multimedia functionalities, allowing seamless handling of steams, videos, and audio for richer user engagement.

Feb 2023 — Oct 2024

Software Engineer, Paramount

As a Software Engineer, I contributed to various high-impact projects across the company, adapting to different roles and technologies as needed

- **Flutter Architect**: Led the development and integration of Flutter modules into existing Android and iOS codebases for both mobile and TV applications, embedding new features seamlessly across platforms.
- **Full Stack Developer**: Developed AI-driven proof-of-concept projects using Python and React, focusing on innovative solutions that leveraged GenAI technologies to enhance various business applications.
- **React Developer**: Contributed to the development of the Kepler TV application, delivering a smooth and engaging user experience for TV platforms.

Feb 2021 — Jun 2022

Flutter developer, Idexx

Architecture leader for a newly established mobile team, I was tasked with recreating IDEXX's legacy medical application

- Worked closely with design team to establish a design system that could be effectively translated into codebase.
- Led the development and implementation of a scalable and maintainable architecture, ensuring the application could be easily extended across multiple platforms.
- Guided a colleague with no prior Flutter experience, successfully mentoring them to become a fully self-sufficient Flutter developer.
- Led the analysis of business requirements, code architecture design, and the automation of builds and distribution, ensuring the delivery of a high-quality product.

Aug 2022 — Jan 2023

Senior Flutter developer, FreshCut

Led efforts to improve application performance

- Enhanced application's overall performance.
- Improved responsiveness and reduced load time.
- Optimized memory usage

Apr 2020 — Mar 2021	**Flutter developer, EmbedIt**
	Contributed to the development of one of the largest mobile platforms for online shopping in India, supporting both B2C and B2B applications.

- Managed key technical and software engineering components, ensuring the platform's robustness and scalability.
- Designed and implemented API models to support new features, facilitating seamless integration and functionality expansion.
- Analyzed business ideas and provided critical technical feedback to guide strategic decisions.

May 2019 — Apr 2020	**Flutter developer, Just It Pro s.r.o**
	Focused on the development of internal applications for HomeCredit and PPF Group employees, successfully delivering three distinct business applications.
Feb 2019 — Jun 2019	**Backend Java developer, T-Mobile**
	CRM development for one of the biggest telecommunications company.
Feb 2017 — Feb 2019	**Full stack Java developer, Tetris s.r.o**
	Developed and maintained internal software for a translation company. Led the end-to-end design and implementation of robust solutions, ensuring seamless integration with the database to support business operations

SKILLS

Flutter	Java
Dart	PostgreSQL
RESTful web APIs	.NET
Python	Kotlin
React / React native	Swift

PROJECTS

Oct 2024	**Trading bot**
	Built an automated crypto trading bot
	Tech Stack: .NET, Python, SQL, React
	Keywords: Full stack
Jan 2020 — Jun 2020	**Stammgast**
	Led a small team in initiating a project using Flutter
	Tech Stack: Flutter
	Keywords: Code architecture, Consultancy & Guidance
Jun 2019 — Oct 2020	**WhozIn**
	Developed a mobile application designed for booking sport events.
	Tech Stack: Flutter, Java, Spring
	Keywords: Full stack

EDUCATION

Sep 2015 — Jun 2019	Bachelor, Faculty of Informatics and Management	Žilina
